

The staging lane for vehicles towing boats coming from the tunnel starts at the entrance directly across from Hobo Bay Trading Company. There is a driveway for the West Launch Ramp and then the staging lane continues toward the East Launch Ramp. There are five staging parking spaces near the ELR. It has been suggested that we allow passenger busses a couple of those spots for tourists to shop at the local businesses on a limited, say two hour basis (policing could be difficult). Bottlenecks are created because of the time it takes to get their boats ready; turn around around time to back down the ramp; buy their launch pass; launch the boat; leave the boat to drive the vehicle with trailer across the tracks to the Whispering Falls Parking Lot; then walk back to their boats.
